EXECUTIVE SUMMARY

Versatile No-Code / Pro-Code Developer with 5+ years of expertise in architecting enterprise-grade applications across Bubble.io, Flutter, React, and TypeScript. Proven track record of reducing operational costs by 60%, improving system efficiency by 40%, and delivering scalable solutions across healthcare, fintech, proptech, community platforms, and marketing automation sectors.

PROFESSIONAL EXPERIENCE

Senior Developer & Solutions Architect

Freelance · December 2020 – Present

1. CureBox — Healthcare & Therapy Platform

React · TypeScript · Supabase · Vite · Tailwind · Zustand

Architected a full-stack healthcare platform connecting patients with licensed therapists. Built role-based dashboards (Patient, Therapist, Admin) with appointment scheduling, Google Calendar integration, real-time messaging, CardCom payment processing, and multi-language support (i18next). Implemented secure auth flows and therapist verification.

2. Samsung Community Mobile App

Flutter · Supabase · Firebase · Dart · FCM

Developed a community engagement mobile app with social feed, academy content & VOD, events management, points-based gamification, in-app store, real-time messaging, and push notifications. Built a companion admin panel for content moderation.

3. E-Shuv — Settlement Management

Flutter · Supabase · Firebase · Vercel

Built a cross-platform settlement management system for residential communities in Israel. Features admin, manager, and resident portals with real-time data sync, authentication, push notifications, and community management workflows.

EDUCATION

BSc Economics & Statistics
KCA University, Nairobi
Expected June 2026 · GPA 3.4/4.0

High School Diploma
Embakasi Garrison SS
Grade B+ · 2017–2021

4. WallCheck — Interactive Floor Planner

JavaScript | HTML5 Canvas | Bootstrap

Engineered an interactive HTML5 Canvas floor-planning tool for the Israeli proptech market. Features precision drawing, shape manipulation, zoom/pan controls, and measurement tools with Hebrew RTL interface, optimized for real-time rendering.

5. AHNA Management System

Bubble.io | Custom Plugins

Architected a management system for a leading international company with 6 advanced modules (Project, Personnel, Customer, Supplier, Dashboard, Analytics). Implemented intelligent agent pool management with skills tracking — 40% efficiency improvement.

6. FFili Influencer Marketing Platform

Bubble.io | Matching Algorithm

Designed an influencer marketing platform connecting brands, influencers, and audiences. Developed smart matching algorithms for product-influencer pairing and personalized campaign recommendations.

7. Katchings Financial Advisory

Bubble.io | FinTech

Engineered a fintech platform empowering advisors to create personalized client portals for investment tracking, with comprehensive financial dashboards and a management interface for consulting agencies.

8. OpenTrade Analytics Suite

Bubble.io | cTrader API

Led development of a trading platform with real-time market data. Implemented cTrader integration and an intelligent algorithm for market pattern identification and personalized trading recommendations.

9. Hi Preemie Baby Care App

Bubble.io | Healthcare

Developed a NICU baby care management app for premature infant care. Built intelligent scheduling for feeding, diaper changes, and medication, integrated with a medical care-guidelines database.

Web Developer & Digital Marketing Specialist

CNC Fitness Hub & Structural Growth Kenya · January 2022 – April 2022

WordPress | M-Pesa | SEO | Google Ads

Redesigned the fitness studio website with a mobile-first approach and M-Pesa payment integration, reducing checkout abandonment by 18%. Executed an SEO strategy increasing organic traffic by 30% in 8 weeks. Managed Google Ads and Facebook campaigns, achieving 25% improvement in lead conversion and 40% reduction in cost-per-acquisition.
